Test Juvenile Dilated Cardiomyopathy (JDCM) Linked Marker-DNA [Fresh EDTA blood]

Result Information

Genotype 1-1 (Homozygous Normal Markers)

Phenotype Probable Normal (Healthy)

Interpretation 1-1 (Probable Normal) dogs are not expected to develop JDCM, nor are they expected to pass a JDCM-causing allele to their offspring. Due to the inherent nature of linked marker tests, there is a slight chance that a pattern 1-1 dog is a carrier of JDCM and an even smaller chance that a pattern 1-1 dog is affected.
